

DrD SPRAY

for screen and CD cleaning

ANTISTATIC

Indigent:

DrD SPRAY for screen and CD cleaning ANTISTATIC, made from plants is a clean extract and it is harmless for human health and environment without use of synthetic detergents. It is approved and analyzed by Institute for Health Protection of Republic of Srpska under the number 1792/20020 dated from April 2. 2002.

Purpose:

You can remove all kind of filthiness (dust, greasiness,...etc) from monitor and all kinds of equipage (computers, TV screens, medical equipment, monitors, screens in manufacturing and surveillance, etc) in the room it gives you the a feeling of natural, pleasant and smell that calms, with the aim to prevent the operator from tiredness and deterrent influence of corpuscular radiation.

Function:

New professional illness which is known in U.S.A. and in the whole world under the name "Computing Visual Syndrome" ("**Kompjuterski Vizuelni Sindrom**") of the operators on the computers as well as on the other monitor devices, work on the x-rays, work on the ultrasound can be stopped only by use of DrD SPRAY. The origination of this professional illness is related to the long-standing work at duties where monitor is used. The operators are exposed to the high grade of electrostatic dust which in the open surfaces of the body (face and hands) causes faster growing old and painful injury of the skin, teasing of eyes, it causes redness of eyes and high grade of sensitiveness of the eyesight, problems whit the focusing of the image. All these parameters brings the possibility of the origination permanent injury of the eyesight. Only the perfectly clean monitor makes the smallest damage to the work of operator.

Appliance

With DrD SPRAY every fourth day, obligatory before you start to work inflict the layer on the monitor and then smoothly wipe with cotton or flax cloth. After this the monitor is clean, without static electricity and greasiness and ready for usage so you can start with your work.
